INSTALLING WORDPRESS
The latest stable release of WordPress (Version 4.7) is available in two formats from the links to your right. If you have no idea what to do with this download, we recommend signing up with one of our web hosting partners that offers a one-click install of WordPress or getting a free account on WordPress.com.

What's Next?

With our famous 5-minute installation, setting up WordPress for the first time is simple. We've created a handy guide to see you through the installation process. If you're upgrading your existing installation, we've got a guide for that, too. And should you run into any trouble along the way, our support forums are a great resource, where seasoned WordPress...
Unzip WordPess into the “webroot”

2. Database username
3. Database password
4. Database host
localhost/phpmyadmin

User accounts
Add user account
1. Database name: wordpress
2. Database username: wordpress
3. Database password: password
4. Database host: localhost
Below you should enter your database connection details. If you’re not sure about these, contact your host.

**Database Name**: wordpress  
The name of the database you want to use with WordPress.

**Username**: wordpress  
Your database username.

**Password**: password  
Your database password.

**Database Host**: localhost  
You should be able to get this info from your web host, if localhost doesn’t work.

**Table Prefix**: wp_  
If you want to run multiple WordPress installations in a single database, change this.
